## Keytrunk Product Line Product Environmental Compliance

Kallastrá is actively pursuing compliance towards the European directives for Restriction of Hazardous Substances (RoHS). The European directive for Restriction of Hazardous Substances 2002/95/EC identifies substance restrictions for products sold into the European Union. Kallastrá's target in support of the RoHS directive is to provide compliant Keytrunk products by May 1<sup>st</sup>, 2007.

The following substance restrictions identified by this directive apply to all Keytrunk products:

- Restriction of lead of 0.01% by weight or 1000 ppm in homogenous material
- Restriction of cadmium of 0.01% by weight or 100 ppm in homogenous material
- Restrictions of mercury of 0.1% by weight or 1000 ppm in homogenous material
- Restrictions of hexavalent chromium of 0.1% by weight or 1000 ppm in homogenous material
- Restrictions of PBDE of 0.1% by weight or 1000 ppm in homogenous material

The product list below identifies the expected RoHS ship dates for the Keytrunk products. Please check back on this page for future updates.
